

## PCL Series Swing Motors

### Features

#### All-in-one Design

All required components for swing motor are one unit. (Planetary gearbox, hydraulic motor, negative type parking brake, Anti-cavitation check valve, other optional valves)

#### Compact

Low height design.

#### Maintenance Free

The gearbox is lubricated by hydraulic oil.

#### High Reliability

All parts including taper roller bearings in gearbox are made and tested by NACHI.

#### High Efficiency

The axial piston motor can maintain good efficiency up to high pressure range.

#### Shockless

Shockless relief valve is standard for smooth operation.
