

PVD Series Double Output Piston Pump

Features

Compact

The most compact double pump in the world. A single pump works as double pump due to our unique structure.

Less than 1% flow difference

Flow difference between each port is minimal.

High efficiency

Axial piston pump exceptional efficiency up to high pressures.

Total Horsepower Control - The engine will never stall

Constant horse power control including feedback from optional gear pump keeps the pump drive power under the engine power curve.

Optional Auxiliary Gear Pumps

Up to two gear pumps can be installed on the rear of the piston pump.

Internal Case Drain

The PVD series has an internal case drain feature. No need for external drain line.
